

### Log Book:

- Stand ups every monday and thursday

### Meeting 1 - 1/4/18

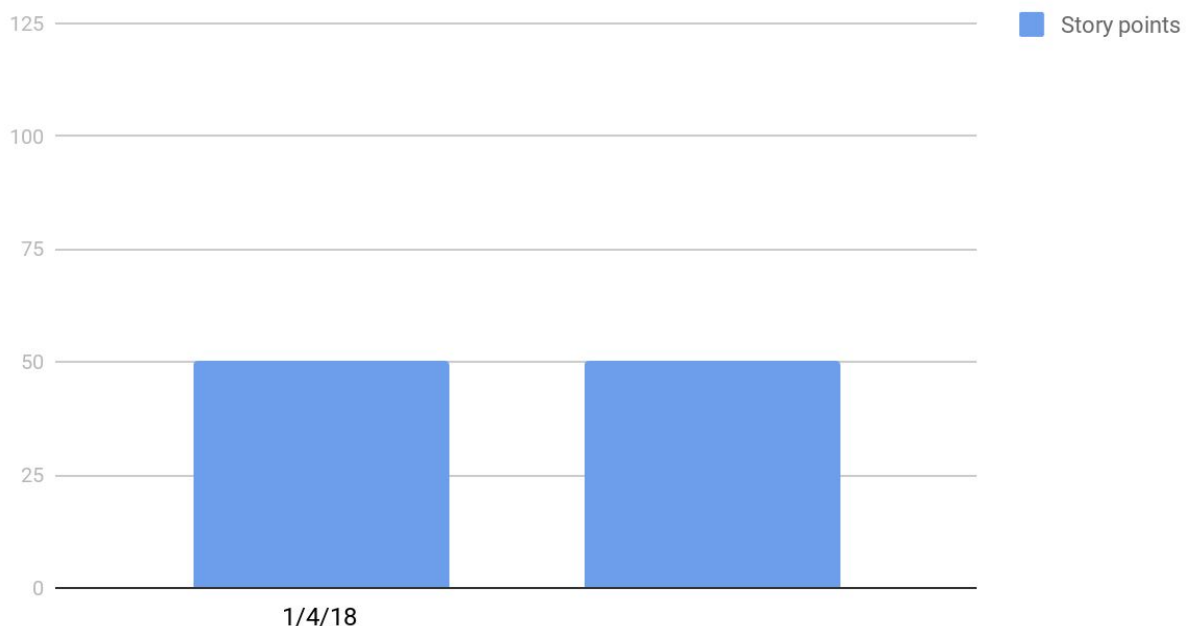

- Went through the assignment specification and created user epics. We then collaboratively, broke down the user epics into more atomic stories.
- Take home: consider what classes we need and the design of the system to be

### Meeting 2 - 4/4/18

- Created CRC cards
- Decided not to do centralised system

### Burn out chart data:

#### Points scored

### Meeting 3 - 11/4/18

- Asked our tutor questions regarding our user stories, we modified them accordingly. Namely, keeping seminars and courses under the same user story as events to reduce redundancy.
- Started our UML diagrams

### Meeting 4 - 14/4/18

- Completed most of our UML diagrams, we are still discussing the public methods for our EventManager class in particular. Seems like we will need to go through some sort of detailed sequence diagram to get a better grasp on the necessary functions.
